

# Bingley

During the year 1894 there were registered as having occurred within the district of the Bingley District Council 160 deaths equal to a rate of 16.515 per 1000 per annum

There were 84 males and 76 females

The ages at which death occurred were

| Under<br>the year | 1 to 5 | 5 to 15 | 15 to 25 | 25 to 65 | 65 and<br>upwards |
|-------------------|--------|---------|----------|----------|-------------------|
| 34                | 16     | 9       | 5        | 56       | 40                |

The diseases which were certified as

the causes of death are classified  
as follows

Zymotic diseases diarrhoea

Cancerous "

Tuberculous "

Affections of the brain and nervous system

" " " respiratory organs

" " " circulatory "

" " " digestive "

" " " urinary "

Congenital debility

Senile decay

Rickets

Lupus

Struma

Inquests

Ovarian disease

Leucocythaemia

Scalding

Hernia

Drowning

During the <sup>year</sup> ~~quarter~~ 232 births (126 boys  
& 106 girls) were registered equal to a  
rate of 23.49 per 1000 per annum. The

Births exceed the deaths by 42 equal to  
a rate of 4.432 per 1000 per annum of  
increase of population. There were 4  
deaths from zymotic diseases equal to  
a rate of 0.622. 21 cases of zymotic  
diseases viz. Typhoid fever 6 Scarlatina 6  
Erysipelas 6 Membranous Croup 2 and  
Diphtheria 1 were reported to me. The  
number of these cases has got less year  
by year for the last four years, and it  
seems to me to shew the advantage of  
notification of the disease and removal  
of the patient to the isolation hospital  
the town has been free from epidemics  
during the year. The birth rate was  
rather lower than that for last year,  
and the death rate was higher. The extremes  
of life furnish a large proportion of the  
deaths, those under 5 and those over 65  
being together 90 equal to 56 per cent of  
the whole.
